Professional Qualifications

- Over 5 years of experiences in software engineering.
- 3 years+ of experience .Net developer, experiences on working with ASP.NET - applications from small to big scale with full understanding of most of the software development process models: waterfall, SRUM. Currently, I'm working as fullstack developer at Somotsoft Inc. I work in development team which will have Scrum daily meeting, retrospective sprint and planning with the team and product owner remotely in US. I have an opportunity to work in teams and independently. I am very comfortable in both the environments. I also have experience working with customer locally and remotely. I had experiences working with co-worker and customer from all over the world, from Japan, India and US.
- Very fast in learning technology and catching up business domain.
- Experience in PHP (CakePHP, Laravel), HTML5, CSS3, JQuery, MVC pattern.
- 1 year of experience in Android development.
- I had the chance to go to New Zealand and work directly with customer.

Professional Experiences

FullStack Developer – Somotsoft Inc, Ho Chi Minh City

(January 2019 – Present)

- Project: **Akouba Credit**
- Position: Developer
- Team size: 6
- Project duration: N/A
- Technical: **Ruby on Rails, PostgreSQL, Scss.**
- Platform: Ubuntu.
- Duties:

- *Developing new features.*

- Brief:

AKOUBA'S LENDING PLATFORM IS ENDORSED BY THE AMERICAN BANKERS ASSOCIATION (ABA).

Akouba is the only small business digital lending solution endorsed by the American Bankers Association (ABA). ABA-endorsed solutions provide banks with the most advanced technologies and products to grow their business, cut costs and transform their customer experience.

The Akouba team was honored to be chosen as a featured platform in ABA's State of Digital Lending report in early 2018. The platform was built to streamline and simplify the online loan origination process that is often cumbersome for financial institutions. As a result, Akouba delivers an end-to-end, industry-leading user experience for both the institution and the end borrower.

.NET Developer – Somotsoft Inc, Ho Chi Minh City

(April 2016 – December 2018)

- Project: **FM:Interact**
- Position: Developer
- Team size: 30
- Project duration: N/A

- Technical: **VB.NET, C#, Telerik, MS SQL Server, JQuery, Javascript, LinQ, Lambda Expression, iTextSharp, Inkscape.**
- Platform: Windows.
- Duties:
 - *Developing new features:*
 - **SLA (Service Level Agreement)** project: *Many companies are required by law or policy to respond to specific events within a specific time. SLAs have these common attributes: Time requirements, Prioritization hierarchy, Notification needs.*
 - **Annotation Management** project: *provide to the user with the ability to rotate, offset and align each line of an annotation. The annotations are room information such as: room name, room type, name of people in the room, area...*
 - **Scenario Planning** project: *provides to the user with the ability to create, visualize and “try on” potential space situations, such as build-outs, expansions, reorganizations, consolidations or re-configurations—so the use will be prepared no matter what happens. The Scenario Planning project helps organizations see into the future in order to pick the best route that will save them the most time and money. An example of this might be an organization seeing what it would look like to move the departments on the 4th floor to the 3rd floor in order to rent out the 5th floor for additional revenue. Or perhaps renting out an additional building if they are expecting a significant amount of growth within the next five years.*
 - **Export svg to pdf** project: *using Inkscape as a 3rd party to convert svg elements to pdf and download to local storage.*
 - *Maintaining the stability of all live systems.*
 - *Suggesting improvements on design and functionality*
- Brief:

FM:Interact is an integrated suite of powerful web-based facility management tools that helps organizations improve their space, occupancy, assets, moves, maintenance, leases and property management. Whether your real estate or facilities portfolio is

small or large, FM:Interact can help you manage today's dynamic facilities environments.
